SOURCE DISCIPLINE

Add activity-specific source lines as needed. Do not turn this record into an equipment shopping list. The business records only the requirements and operating restrictions it actually verified for this site and activity.

02

Current rule register

One line per current rule. Guest wording, Agreement wording, and Card wording must point in the same direction.

CURRENT MEANS ALIGNED

If the exact guest wording, Agreement plate, Card line, or source review is no longer aligned, pause release of the affected rule until the named authority resolves the conflict.

03

Review log

A rule change is not complete until every affected channel has been checked.

SAME-DAY CONTROL

A change is recorded before old guest materials, maps, decals, training references, or web wording remain in circulation. Outdated materials are removed, voided, or replaced through the named authority.

04

Display / decal plan

Complete only if this house uses a map, decal, or other approved visual channel.

DISPLAY ID	LOCATION ON ASSET / SITE	WORDING COPIED FROM CURRENT CARD	VISION / LABELS CLEAR	EDITION	NEXT REVIEW

02			[] YES [] NO		
03			[] YES [] NO		
04			[] YES [] NO		
05			[] YES [] NO		
06			[] YES [] NO		

Display control

The wording comes from the current Card / Standard. The display must remain readable and must not obstruct vision, controls, required labels, or manufacturer warnings. A graphics vendor produces the display; it does not decide the rule.

VERSION REMOVAL RULE

When the rule changes, outdated decals or displays are removed, covered, voided, or replaced the same day before affected equipment is released.

05

Guest acknowledgment log

Track which current Card was shown for each rental. This log is operational; the signed Card or acknowledgment copy lives with the customer rental.

Record control

Keep operational control records, employee evidence, and customer copies in their correct files.

RECORD	PRIMARY FILE	COPY / ACCESS RULE
Source verification + review log	Operations control file	Named authority and authorized internal reviewers. Not a customer-file substitute.
Current rule register + display / decal plan	Operations control file	Controlled working record. Superseded editions are retained or disposed of according to the Office Standard.
Signed Guest Card / acknowledgment	Customer rental file	Copy remains with the rental record. The operations log may note that the signed Card exists.
Private Rental Warning Notice	Operations file + customer rental file	Customer receives or is provided the notice when applicable. Preserve delivery method if signature is declined, unavailable, or unsafe.
Private Rental Termination Notice	Operations file + customer rental file	Preserve the notice, supporting facts, and official report reference if one exists.

NOT MESSAGE-THREAD STORAGE

A completed warning, termination, acknowledgment, source verification, or review entry is not considered controlled merely because it exists in a text thread, email chain, or private message. File the record in the designated system before the shift closes.

Retention and access

Who may read the record and how long it is retained follow the Office Standard, the business access policy, and current local requirements. This register does not invent a retention period.

CLOSING NOTICE

Adapt this record to the site, activity, insurer, and local law. Verify current requirements and have customer-facing enforcement language reviewed by qualified counsel before use.
