

# FORECAST CONTROL RECORD

*Source the assumption. Stress the model. Replace forecast with actuals.*

CONTROLLED RECORD / MODEL PLATE

|                           |                                                   |
|---------------------------|---------------------------------------------------|
| CLASSIFICATION            | CONFIDENTIAL / INTERNAL / OWNER + NAMED AUTHORITY |
| RECORD TEMPLATE EDITION   | 01 / SEPTEMBER 2026                               |
| BUSINESS                  |                                                   |
| SITE                      |                                                   |
| PLANNING HORIZON          |                                                   |
| STANDARD EDITION IN FORCE |                                                   |
| MODEL PATTERN             |                                                   |
| PREPARED BY               |                                                   |
| DATE PREPARED             |                                                   |

**MODEL CONTROL**

This record organizes a forecast. It does not create a guarantee, valuation, tax return, lender package, or profit claim.

SOURCE. MODEL. STRESS. UPDATE.

01

# Assumption register

Every material input keeps a source label. A later-year change also keeps the written reason that supports it.

ASSUMPTIONS / SOURCE CONTROL

| ID | ASSUMPTION | YEAR | SOURCE / EVIDENCE | QUOTE / ESTIMATE / UNLABELED | REASON IF CHANGED LATER |
|----|------------|------|-------------------|------------------------------|-------------------------|
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |
|    |            |      |                   |                              |                         |

SOURCE RULE

Verified quote = external or documented support. Owner estimate = clearly labeled internal assumption. Unlabeled = not decision-grade. A Year 2 or Year 3 change requires a written reason; momentum alone is not a reason.

02

# Year 1 plate

Year 1 begins without house operating history. Keep the first model conservative and make every major assumption traceable.

CAPACITY / UNITS AVAILABLE

Name the capacity measure used by this model

RATE / PRICING BASIS

Reference the assumption ID or source

SEASON SHAPE / OPERATING PATTERN

Season blocks, operating days, occupancy pattern, or other named structure

OTHER REVENUE USED, IF ANY

Name it and cite its assumption source; otherwise leave blank

REVENUE PICTURE

| REVENUE LINE / DRIVER | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|-----------------------|----------------|--------------------------|
|                       |                |                          |
|                       |                |                          |
|                       |                |                          |

EXPENSE PICTURE

| EXPENSE LINE / FIXED LOAD | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|---------------------------|----------------|--------------------------|
|                           |                |                          |
|                           |                |                          |
|                           |                |                          |

MODELED OPERATING RESULT - NOT PROFIT

Revenue less the operating costs included in this model only. Taxes, depreciation, financing, owner distributions and other items may sit elsewhere.

STARTING-RATIONALE NOTE

Why these opening assumptions are conservative / supportable

03

# Year 2 plate

Change only what evidence or a named decision supports. Record why this year differs from Year 1.

**CAPACITY / UNITS AVAILABLE**  
Name the capacity measure used by this model

**RATE / PRICING BASIS**  
Reference the assumption ID or source

**SEASON SHAPE / OPERATING PATTERN**  
Season blocks, operating days, occupancy pattern, or other named structure

**OTHER REVENUE USED, IF ANY**  
Name it and cite its assumption source; otherwise leave blank

REVENUE PICTURE

| REVENUE LINE / DRIVER | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|-----------------------|----------------|--------------------------|
|                       |                |                          |
|                       |                |                          |
|                       |                |                          |

EXPENSE PICTURE

| EXPENSE LINE / FIXED LOAD | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|---------------------------|----------------|--------------------------|
|                           |                |                          |
|                           |                |                          |
|                           |                |                          |

MODELED OPERATING RESULT - NOT PROFIT

Revenue less the operating costs included in this model only. Taxes, depreciation, financing, owner distributions and other items may sit elsewhere.

REASON FOR CHANGE VS YEAR 1

Evidence or named decision required

04

# Year 3 plate

Change only what evidence or a named decision supports. Record why this year differs from Year 2.

CAPACITY / UNITS AVAILABLE

Name the capacity measure used by this model

RATE / PRICING BASIS

Reference the assumption ID or source

SEASON SHAPE / OPERATING PATTERN

Season blocks, operating days, occupancy pattern, or other named structure

OTHER REVENUE USED, IF ANY

Name it and cite its assumption source; otherwise leave blank

REVENUE PICTURE

| REVENUE LINE / DRIVER | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|-----------------------|----------------|--------------------------|
|                       |                |                          |
|                       |                |                          |
|                       |                |                          |

EXPENSE PICTURE

| EXPENSE LINE / FIXED LOAD | MODELED AMOUNT | ASSUMPTION / SOURCE REF. |
|---------------------------|----------------|--------------------------|
|                           |                |                          |
|                           |                |                          |
|                           |                |                          |

MODELED OPERATING RESULT - NOT PROFIT

Revenue less the operating costs included in this model only. Taxes, depreciation, financing, owner distributions and other items may sit elsewhere.

REASON FOR CHANGE VS YEAR 2

Evidence or named decision required

05

# Stress plate

Run at least one lower case chosen by this house. The purpose is to see whether the modeled business can still carry the obligations it must carry.

**FACTOR USED**  
Example only: a lower revenue factor such as 75%, lower utilization, fewer operating days, higher fixed costs, or another named stress.

**YEAR(S) STRESSED**

**BASE CASE REFERENCE**

**STRESS-CASE RESULT**

FIXED OBLIGATIONS / LOAD TO CARRY

| OBLIGATION / FIXED LOAD | AMOUNT / BASIS | CAN STRESS CASE CARRY IT? Y/N / NOTE |
|-------------------------|----------------|--------------------------------------|
|                         |                |                                      |
|                         |                |                                      |
|                         |                |                                      |
|                         |                |                                      |
|                         |                |                                      |

CAN THE HOUSE CARRY THE FIXED OBLIGATIONS UNDER THIS STRESS?

☐ Yes

☐ No

**STRESS FINDING / WHAT FAILS FIRST / ADJUSTMENT REQUIRED**

**STRESS RULE**  
If the lower case cannot carry the fixed load the house must carry, the base case is not yet supportable without adjustment, more evidence, or a different operating structure.

06

# Decision plate

*This is the forecast decision, not the Business Plan GO decision. It states whether the current model is supportable enough to use for planning.*

## FORECAST DECISION

- ☐ SUPPORTABLE ON CURRENT ASSUMPTIONS      ☐ ADJUST
- ☐ CONTINUE RESEARCHING      ☐ TOO AGGRESSIVE      ☐ NOT READY

### BASIS FOR THE DECISION

*Cite assumptions, year plates, stress result or professional review*

---

---

---

---

### CHANGES / CONDITIONS BEFORE THE MODEL IS TREATED AS SUPPORTABLE

---

---

---

### NAMED AUTHORITY

### DECISION DATE

### NEXT REVIEW DATE

### MODEL EDITION AFTER DECISION

## BOUNDARY

The Forecast Control Record can support or challenge the financial model. Whether the overall project moves forward is recorded in the Business Plan Record and the applicable launch gates.

07

# Actuals + record control

*When a modeled year closes, actual results replace assumptions as the primary evidence for that completed period. Keep the variance visible; do not silently preserve the forecast as truth.*

## ACTUALS PLATE - WHEN A YEAR CLOSSES

| YEAR | MODELED | ACTUAL | VARIANCE NOTE / WHAT CHANGED | MODEL EDITION AFTER UPDATE |
|------|---------|--------|------------------------------|----------------------------|
|      |         |        |                              |                            |
|      |         |        |                              |                            |
|      |         |        |                              |                            |

### RECORD CONTROL

#### Primary file: Finance / Planning.

Not the customer drawer. Not the unit file. Customer and fleet records may be cited by reference only when they support an assumption or actual.

Business Plan = planning picture. Forecasting = financial model. Road Beyond Launch = post-launch review using actual results.

## 100% CONTROL TEST

| CONTROL QUESTION                   | WHERE THE ANSWER LIVES                     |
|------------------------------------|--------------------------------------------|
| Where did the rate come from?      | Assumption Register                        |
| Why did capacity change in Year 2? | Reason on Year 2 Plate                     |
| What happens in a 75% case?        | Stress Plate - if 75% is the factor chosen |
| Does the plan say GO?              | Business Plan Record - not here            |
| What happens after launch?         | Actuals feed Road Beyond Launch            |

### CLOSE RULE

A closed year is updated with actuals, the variance is explained, and the next model edition is identified. The previous forecast remains a historical planning record - not a substitute for actual results.
