

FLEET UNIT RECORD

One asset. One written life. Logs reprintable.

UNIT PLATE

ASSET ID	ASSET CLASS
MANUFACTURER	MODEL
SERIAL / VIN / INTERNAL REF	IN-SERVICE DATE
HOURS / DISTANCE IF USED	CURRENT STATUS
KEY LOCATION	MANUAL LOCATION

RECORD RULE

This file follows the asset, not the customer. Status changes are written here; guest condition records remain in Pickup & Return. Reprint any log page when full and carry the Asset ID forward.

01

Status log

Every status change gets a date, a reason, an authority and a next action.

STATUS LANGUAGE

Use only the current status: READY, OUT OF SERVICE (OOS), RETURN TO SERVICE (RTS), or RETIRED. A blank line never means ready.

DATE	STATUS	REASON / CONDITION	AUTHORITY	NEXT ACTION

02

Cleaning log

Cleaning records presentation readiness. It does not certify mechanical readiness.

PRE-CLEAN RULE

Do not wash over evidence of possible new damage. If damage is seen before cleaning, stop long enough to preserve the condition, link the appropriate record, then proceed only when allowed.

DATE	DONE BY	READY TO SHOW	DAMAGE SEEN BEFORE WASH	LINKED FILE / NOTE
		☐ YES ☐ NO	☐ Y ☐ N	
		☐ YES ☐ NO	☐ Y ☐ N	
		☐ YES ☐ NO	☐ Y ☐ N	
		☐ YES ☐ NO	☐ Y ☐ N

03

Daily readiness log

Short by design. One question: may this unit leave today?

BOUNDARY

This page does not replace Pickup & Return and does not reproduce an inspection checklist. The house process determines how readiness is checked; this page records the result.

DATE	RESULT	BY WHOM	NOTE / LINKED HOLD

04

Preventive log

Copy the interval from the current manufacturer schedule. Do not invent one here.

MANUFACTURER CONTROLS THE INTERVAL

Each asset class may have a different schedule. Enter only the work and interval that apply to this unit. Qualified work stays qualified work; availability of a part does not grant repair authority.

ITEM / SERVICE	MANUFACTURER INTERVAL	LAST	NEXT DUE	BY WHOM

05

Hold / out-of-service plate

Write the hold. Secure the key. Update availability. Do not release by habit.

HOLD IDENTITY

ONE HOLD / OOS EVENT PER PLATE

ASSET ID

CONTROL ACTIONS

KEY SECURED WHERE

AVAILABILITY UPDATED BY

☐ YES☐ NO

LINKED INCIDENT / RETURN FILE

NEXT ACTION / REVIEW OWNER

STATUS RULE

Once this plate is opened, the unit remains HOLD / OOS until a Return-to-Service plate is completed by the named authority. Cleaning or an informal verbal check does not clear the hold.

REPRINT FOR EACH HOLD EVENT

06

Return-to-service plate

Only named authority closes a hold and restores availability.

CLEARANCE IDENTITYLINK TO THE HOLD / OOS EVENT

ASSET IDHOLD / OOS DATE OR REF

WHAT WAS CLEARED / BASIS FOR RETURN TO SERVICE

AUTHORIZATIONRTS IS A STATUS DECISION, NOT A CLEANING RESULT

AUTHORIZED BYDATE / TIME

AUTHORIZATION SIGNATURE

☐ OOS mark / tag removed☐ Availability updated☐ Key returned to controlled set

RESTRICTIONS, IF ANY

RTS RULE

The defect or hold condition must be addressed or formally accepted in writing by the named authority. If a restriction remains, write it here and keep the asset status aligned in the availability system.

REPRINT FOR EACH RTS EVENT

07

Record control

Keep the asset life in the fleet file. Keep the customer file separate.

WHERE EACH RECORD LIVES

DO NOT MIX FLEET CONTROL WITH CUSTOMER OR PURCHASING FILES

OPERATIONS / FLEET FILE

Unit plate; status log; cleaning log; daily readiness result; preventive log; Hold/OOS plates; Return-to-Service plates; linked incident or return references.

CUSTOMER RENTAL FILE

May cite the Asset ID and the guest-facing Pickup & Return record. Do not move the unit life log into the customer file.

PURCHASING / SHOP FILE

Parts stock, purchase cost, labor cost, vendor invoices, and inventory accounting live outside this Unit Record.

CONTINUATION CONTROL

LOG PAGES MAY BE REPRINTED

When a log page is full, reprint that page only. Carry forward the Asset ID and keep continuation pages in date order behind the same unit file. Do not restart the identity plate unless the business intentionally opens a new controlled record.

CONTROL NOTE

This record documents operational status decisions. It is not a repair licence, mechanical certification, manufacturer service manual, or substitute for qualified technical work.
