

BUSINESS PLAN RECORD

One plan. One evidence trail. One controlled decision.

PLAN PLATE

BUSINESS NAME	
OWNER / PLANNING AUTHORITY	
PROPOSED SITE	
BUSINESS STRUCTURE	
DATE PREPARED	
PLANNING PERIOD	
STANDARD EDITION IN FORCE	

CONFIDENTIALITY

Do not place Social Security numbers, bank or account credentials, Employer Identification Numbers, or other sensitive identifiers in a circulated planning copy.

01

Concept + offer plate

State the concept plainly. Then show what the business actually intends to sell or rent and the source quality behind each proposed price.

WHAT IS OFFERED

WHO IS SERVED

WHERE THE BUSINESS INTENDS TO OPERATE

HOW MONEY IS MADE

WHAT WOULD DISTINGUISH THE BUSINESS

OWNER AIM / PLANNING OBJECTIVE

FINANCING CONTEMPLATED

☐ Yes

☐ No

OFFER / PRICE BASIS

SERVICE / ASSET CLASS	DESCRIPTION	PROPOSED PRICE	SOURCE: QUOTE / ESTIMATE / UNLABELED

ASSUMPTION RULE

An unlabeled price is not decision-grade. If the source cannot be identified, verify it, label it as an owner estimate, or leave the decision open.

02

Market plate

Record the market this house actually intends to serve. Avoid generic customer lists that are not part of this plan.

PRIMARY MARKET / OPERATING AREA

CUSTOMER GROUPS ACTUALLY INTENDED

SEASONAL SHAPE / DEMAND PATTERN

COMPETITORS / ALTERNATIVES

COMPETITOR / ALTERNATIVE	WHAT CUSTOMER USES INSTEAD	OBSERVED / SOURCE	RELEVANT GAP OR DIFFERENCE

STILL UNVERIFIED / RESEARCH OPEN

List market claims, demand assumptions, seasonal assumptions, competitor information, or customer behavior that still requires evidence.

03

Local constraints plate

Verify the place before capital. A proposed site is not usable merely because the business likes it.

VERIFICATION REGISTER

REQUIREMENT / CONSTRAINT	CONTACTED WHOM / SOURCE	DATE	STATUS: VERIFIED / OPEN

EVIDENCE RETAINED / WHERE LOCATED

WHAT REMAINS OPEN BEFORE CAPITAL MOVES

PRE-CAPITAL RULE

Registration, licence, site use, operating restrictions, insurance availability, storage, access, and other material local conditions must be verified to the level needed for this plan. Open constraints keep the plan in research.

04

Operations sketch

Show ownership of the major operating functions. Do not rebuild the SOP inside the plan.

FUNCTION OWNERSHIP

FUNCTION	OWNER / RESPONSIBLE PERSON	PROCEDURE EXISTS Y/N	PLANNING NOTE / DEPENDENCY

OPERATING HOURS / SEASONALITY NOTE

Write the intended hours or seasonal pattern as a planning note. Do not use a Monday-Sunday classroom grid unless the business actually needs one.

CRITICAL HANDOFFS / DEPENDENCIES

OPEN OPERATING QUESTIONS

BOUNDARY

This page sketches responsibility and feasibility. Detailed opening, release, return, incident, fleet, and customer procedures stay in their controlled operating documents.

05

Asset + systems plate

Separate what must exist to operate from the vendor or product shopping detail used to source it.

ASSET / CAPABILITY STATUS

ASSET / CAPABILITY	QUANTITY	STATUS: PLANNED / ORDERED / OWNED	SOURCE / DEPENDENCY / NOTE

SYSTEMS

SYSTEM / CONTROL FUNCTION	NAMED SYSTEM SELECTED	STILL NEEDED / DECISION OPEN

CAPITAL SEQUENCE

The site and material operating constraints are verified before the house treats major fleet or asset purchases as approved capital commitments.

06

Money picture - startup

Record the startup picture without turning the Business Plan into the Forecasting model. Each figure keeps its source status.

STARTUP INVESTMENT LINES

STARTUP CATEGORY	AMOUNT	SOURCE TYPE	VERIFIED QUOTE Y/N / SOURCE NOTE

WORKING CAPITAL

CONTINGENCY

SOURCE NOTE / ASSUMPTIONS BEHIND STARTUP PICTURE

STARTUP TOTAL

Enter a total only when the supporting lines above exist and are sourced.

07

Money picture - operating

Keep recurring operating assumptions visible. Detailed 36-month modeling belongs in Forecasting when used.

OPERATING ESTIMATE LINES

OPERATING CATEGORY	MONTHLY ESTIMATE	ANNUAL ESTIMATE	SOURCE NOTE / BASIS

REVENUE PICTURE / BASIS ONLY

FUNDING / CASH SOURCE NOTE

OPERATING TOTAL

Use only when the lines above support the total.
Forecasting owns detailed projections and scenarios.

08

Risk plate

Name the material risks this model actually faces, the planned control, and the controlled document that will own the operating detail.

MATERIAL RISK	PLANNED CONTROL / MITIGATION	OWNING CONTROLLED DOCUMENT

PROFESSIONAL REVIEW STILL REQUIRED

RISK THAT COULD CHANGE THE PLANNING DECISION

PLANNING RULE

The Business Plan names the risk and the intended control. It does not copy the SOP, Agreement, Fleet Standard, Local Rules, insurance policy, or legal analysis into this file.

09

Decision plate

A planning decision is recorded only after the house can distinguish verified information, owner estimates, and open research.

PLANNING DECISION

☐ GO☐ ADJUST☐ CONTINUE RESEARCHING☐ RECONSIDER

REASON FOR DECISION

NEXT ACTION

WHAT MUST BE TRUE BEFORE CAPITAL MOVES

NAMED AUTHORITY

DATE

AUTHORITY SIGNATURE / INITIALS

DECISION MEANING

GO means the owner has enough verified planning support to proceed to the stated next action. It does not guarantee demand, financing, compliance, profitability, or operational success.

10

Record control

This is the owner / planning file. It does not become a customer file, fleet unit file, or substitute for Forecasting.

RECORD	PRIMARY HOME	CONTROL RULE
Business Plan Record	Owner / planning file	Concept, market, constraints, operations sketch, assets, systems, money picture, risk, and planning decision.
Forecasting, if used	Finance / planning file	Detailed 36-month numbers, scenario assumptions, cash flow, and modeled projections.
Launch Roadmap	Launch / implementation file	Sequence from planning decision toward first controlled operations.
Road Beyond Launch	Post-launch growth file	Evidence-based review after launch and later growth decisions.
Fleet / customer records	Their own controlled files	This Business Plan Record may cite them but does not store their transaction or unit detail.

100% CONTROL TEST

QUESTION	WHERE THE ANSWER MUST LIVE
Are we buying the fleet tomorrow?	Decision plate + verified constraints
Is this price a quote?	Offer / money source
Who verified the local route / site requirement?	Constraints plate
Where is the detailed 36-month model?	Forecasting - not here
What governs after opening?	Road Beyond Launch

RECORD RULE

Keep the planning copy free of sensitive identifiers. Retain source evidence where the business controls it. A clean-looking record is not complete unless the supporting assumptions and decision basis can be traced.
